

Showcasing Coronado National Forest's Partnership Programs

Project Title	Showcasing Coronado National Forest's Partnership Programs
Project Summary	To highlight/showcase Coronado National Forest's Partnership Programs, using electronic media (our internal websites).
Country	United States

Project Description

The Coronado National Forest is the premier attraction for visitors in southeastern Arizona. In order to keep forest visitors and wildlife coming back, we are mandated to conserve forest land for multiple use, while protecting it for future generations. We maintain these missions through the assistance of our many partners and partnership groups. The relationships that we have developed with partner groups have been paramount in the Coronado's success in forest restoration, species resiliency, and recreation program management. The Coronado National Forest's legacy as natural resource stewards will continue to attract numerous agencies/organizations to further assist us with caring for the land.

The Coronado National Forest would like to showcase the many partners and partnership groups that help us accomplish our missions. This can be done by adding multimedia content to our websites that highlight/outline the successes we've shared with our partners over the years.

Required Skills or Interests

Skill(s)

Design thinking

Editing and proofreading

Infographic design

Social media management

Website design
